# REVIEW

What would you like to review?

# CLASS & ID

With classes and ids we can target specific elements on a page, so we can manipulate them uniquely.

# CLASS & ID

# CLASS & ID

# CLASS & ID

## IDS ARE UNIQUE

They can be used **ONCE** per page

## CLASSES ARE NOT UNIQUE

They can be reused **MANY** times per page

# CLASS & ID

When should you use them?

# CLASS & ID

How to **select** classes and ids in CSS

```
.class-name {  
    /* styles go here */  
}  
  
#id-name {  
    /* styles go here */  
}
```

# LAYING OUT YOUR CONTENT

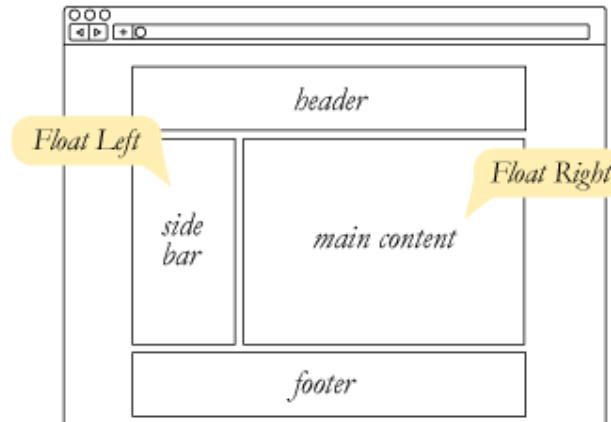

# HTML5 STRUCTURAL ELEMENTS

Adding structure to HTML elements that are related to content layout.

- header
- aside
- footer

# FLOATS

`float` is a CSS positioning property, used to layout a web page.

# FLOATING SECTIONS

# CLEARFIX

We saw how containers with multiple floated elements inside them can collapse. We can work around this with clearfix.

```
.clearfix:before,  
.clearfix:after {  
    content: " ";  
    display: table;  
}  
  
.clearfix:after {  
    clear: both;  
}
```

# **DIV UP THE CONTENT**

- When Do I need a Div, Section or Article?
- When do I need a class or id?
